Math Tutor (Part-time) — *December 2021 - August 2022*

- Communicated with students, scheduled appointments, and tutored calculus to over 20 students weekly
- Trained in andragogical methods; approached tutees with focus on inquiry-based learning

Projects

- **Machine Learning Project: Linking Writing Processes to Writing Quality**

  - Predicted the overall writing quality of mock SAT essays using dataset of keystroke logs stripped of alphanumeric information
  - Derived original features and those from current literature concerning the real-time prediction of writing quality with keystroke data
  - Used sk-learn's Histogram-Based Gradient Boosting Regression Tree; tuned hyperparameters, employed cross-validation, analyzed feature importance
  - Placed in the 63rd percentile in my first Kaggle competition

- **Make OH/IO 2023 Competition**

  - Conceptualized an updated cleanroom garment with tear sensors, improved boot covers, and redesigned masks for use in Intel's semiconductor factories
  - Designed a proof-of-concept using an Arduino board and cleanroom garment materials
  - Received 1st place in the competition

- **Buckeye Solar Racing**   Ohio State University
  Aerodynamicist   *August 2021 - August 2022*
  - Researched performance of various solar car geometries, designed canopy and aeroshell in SolidWorks, ran CFD with STAR-CCM+
  - Meshed existing canopy with photogrammetry software, compared prototypes to physical model, finalized design, integrated with remainder of solar car

- **NASA L'SPACE Mission Concept Academy**   Online
  Aerospace Engineer   *May 2021 - August 2021*
  - Collaborated with 10-person interdisciplinary team to conceptualize a mission to drill water-ice from the lunar south pole, including site selection, rover design, system integration, risk mitigation, and success criteria
